Economic Modelling

Index to Volume 7

January, April, July, October 1990

Articles – titles

Are the markets for financial assets efficient? Evidence for the USA, 1974–88. *Noel D. Uri* and *Jonathan D. Jones*. 7.4, 388–394

Asset pricing in an inefficient market. *Robert I. Webb*. 7.4, 395–399

CESAM: the CCSO annual model of the Dutch economy. *S.K. Kuipers, B.W.A. Jongbloed, G.H. Kuper* and *E. Sterken*. 7.3, 202–250

The commodity technology revisited: theoretical basis and an application to error location in the make–use framework. *Albert E. Steenge*. 7.4, 376–387

A disequilibrium macroeconomic model of the Belgian economy: the Maribel II model of the Planning Bureau. *H. Bogaert, T. de Biolley* and *J. Verlinden*. 7.4, 310–375

An econometric model of China's national income. *Qing-Ling Yu*. 7.3, 258–262

Econometric versus quasiempirical models: macroeconomic policy analysis in the Netherlands. *P.J.A. van Els*. 7.2, 133–147

Forecasting industrial bottlenecks: an analysis of alternative approaches. *H.O. Stekler*. 7.3, 263–274

FYSIOEN: macroeconomics in computer graphics. *P. Kramer, P.P.J. van den Bosch, T.J. Mourik, M.M.G. Fase* and *H.R. van Nauta Lemke*. 7.2, 148–160

The historical tracking performance of UK macroeconomic models 1978–85. *P.G. Fisher* and *K.F. Wallis*. 7.2, 179–197

Intermod 1.1: a G7 version of the IMF's MULTIMOD. *John F. Helliwell, Guy Meredith, Yves Durand* and *Philip Bagnoli*. 7.1, 3–62

The Italian continuous time model: theory and empirical results. *G. Gandolfo* an *P.C. Padoan*. 7.2, 91–132

Non-linear programming models for sector and policy analysis: experiences with the Turkish agricultural sector model. *S. Bauer* and *H. Kasnakoglu*. 7.3, 275–290

Policies for exchange rate stabilization on the UK Treasury model. *Jeremy Bray*. 7.1, 63–86

A short-run forecasting model of Ghana. *E.E. Ghartey* and *U.L.G. Rao*. 7.3, 291–308

Solving stochastic equilibrium models with the extended path method. *J.E. Gagnon* and *J.B. Taylor*. 7.3, 251–257

Tractable risk sensitive control based on approximate expected utility. *D.W. Mitchell*. 7.2, 161–164

Wealth constraints and consumer behaviour. *M. Weale*. 7.2, 165–178
